(54) Title: **WIRELESS COMMUNICATION NETWORK MEASUREMENT DATA COLLECTION USING INFRASTRUCTURE OVERLAY-BASED HANDSET LOCATION SYSTEMS**

(57) Abstract: A method and system for collecting test and measurement data for a wireless communication system utilizes a network overlay geo-location system to collect the data (210-220). The wireless communication system has plural base stations defining a signal coverage (230-250) area for communication with a mobile appliance and collects test and measurement data simultaneous on the forward and reverse links during standard geo-location processes (250, 360-390). The wireless communication system also collects test and measurement data when the network overlay geolocation system is in an idle state.
